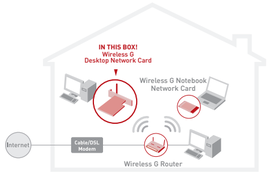
BELKIN® | Wireless G Desktop Network Card

Connect your desktop computer to a FAST wireless network

Here's what it does

The Belkin Wireless G Desktop Network Card connects your desktop computer to your wireless network. With a Belkin Wireless G Router as the central connection point of your network, your computers can share your high-speed Internet connection as well as files, printers, and hard drives.



Here's what you need

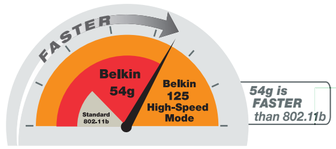
The Central Connection Point

The **Wireless G Router** is the central connection point of your wireless network. Position your Belkin Router between your cable or DSL modem and your computer to start sharing your broadband Internet access.

For Desktop Computers

A **Wireless G Desktop Network Card** connects a desktop computer to your wireless network.
Note: You must first have a Wireless Router to establish a wireless network.

NOTE: If you currently have a computer that is directly connected to the modem, you will not need an additional wireless card/adapter for that computer.



54g is FASTER than 802.11b

The **Wireless G Notebook Network Card** implements 54g technology that is up to a 75% faster than stantdard 802.11b products. 54g technology is ideal for homes and offices that require faster networking speeds to allow for uninterrupted Internet and file sharing.

To gain even faster networking speeds, look for Belkin High-Speed Mode Wireless G products that increase networking speeds by up to 80% faster than 802.11b networks and up to 35% faster than standard 802.11g networks.

802.11g 54 Mbps 2.4GHz • Wireless

3 Easy Steps

Please refer to the Quick Installation Guide for detailed instructions

Step 1
Insert the CD in your CD-ROM drive

Step 2
Insert the Wireless G Desktop Network Card into an available PCI slot located inside your desktop computer

Step 3
Start networking!

BELKIN® | Carte Réseau Sans Fil G pour ordinateur de bureau

Reliez votre ordinateur de bureau à un réseau sans fil RAPIDE

Voici comment

La **Carte Réseau Sans Fil G pour ordinateur de bureau** permet de relier votre PC à un réseau sans fil. Grâce au **Routeur Réseau Sans Fil G de Belkin**, agissant en tant que centre nerveux de votre réseau, vos ordinateurs peuvent partager une connexion Internet à haut débit, des fichiers, des imprimantes et des disques durs.

VOUS TROUVEREZ DANS CETTE BOÎTE !
Carte Réseau Sans Fil G pour ordinateur de bureau
Carte Réseau Sans Fil G pour ordinateur portable
Internet
Cable/DSL Modem
Routeur Sans Fil G

Voici ce dont vous avez besoin

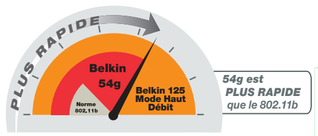
Le cœur de votre réseau

Le **Routeur Réseau Sans Fil G** agit comme centre nerveux de votre réseau sans fil. Placez votre Routeur de Belkin entre votre modem câble/DSL et votre ordinateur et vous pourrez partager votre connexion internet à large bande.

Pour les ordinateurs de bureau

Une **Carte Réseau Sans Fil G pour ordinateur de bureau** permet de relier votre PC à un réseau sans fil.
Remarque : Vous devez d'abord posséder un Routeur Sans Fil pour établir une connexion avec un réseau sans fil.

REMARQUE : Si l'un de vos ordinateurs est relié directement au modem, vous n'aurez pas besoin d'un adaptateur ou d'une carte réseau sans fil pour cet ordinateur.



54g est PLUS RAPIDE que le 802.11b

La Carte Réseau Sans Fil G pour ordinateur de bureau permet la création d'un réseau sans fil 54g qui est jusqu'à 75% plus rapide que la norme 802.11b. La technologie 54g est idéale pour les domiciles ou les petites entreprises qui nécessitent une vitesse réseau plus rapide, pour le partage d'une connexion Internet ou de fichiers.

Pour une vitesse réseau encore plus rapide, procurez-vous les produits Belkin Sans Fil G Mode Haut Débit (MHD), qui permettent la création d'un réseau sans fil jusqu'à 80% plus rapide que la norme 802.11b et jusqu'à 35% plus rapide que la norme 802.11g.

BELKIN® | Kabellose Desktop-Netzwerkkarte

Schließen Sie Ihren Desktop-Computer an ein SCHNELLES kabelloses Netzwerk an

Funktion des Geräts

Die **Belkin Kabellose Desktop-Netzwerkkarte** verbindet Ihren Desktop-Computer mit Ihrem kabellosen Netzwerk. Mit einem **Belkin Kabellosen DSL/Kabelrouter** als zentralem Verbindungspunkt Ihres Netzwerks, können Ihre Computer sowohl Ihre Hi-Speed Internetverbindung als auch Dateien, Drucker und Festplatten gemeinsam nutzen.

Was Sie benötigen

Der zentrale Verbindungspunkt

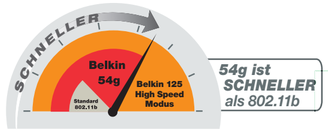
Der **Kabellose DSL/Kabelrouter** ist der zentrale Verbindungspunkt Ihres kabellosen Netzwerks. Stellen Sie Ihren Belkin Router zwischen Ihrem Kabel- oder DSL-Modem und Ihrem Computer auf, so dass Sie mit der gemeinsamen Nutzung Ihres Breitband-Internetzugangs beginnen können.

Für Desktop-Computer

Eine **kabellose Desktop-Netzwerkkarte** verbindet Ihren Desktop-Computer mit Ihrem kabellosen Netzwerk.

Hinweis: Sie brauchen erst einen kabellosen DSL/Kabelrouter, um ein kabelloses Netzwerk aufzubauen.

HINWEIS: Wenn Sie einen Computer haben, der direkt an das Modem angeschlossen ist, brauchen Sie keine zusätzliche kabellose Netzwerkkarte und keinen zusätzlichen kabellosen Adapter für diesen Computer.



54g ist SCHNELLER als 802.11b

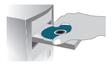
Die **Kabellose Desktop-Netzwerkkarte** ist mit Technologie nach dem Standard 54g ausgestattet und ist dadurch bis zu 75% schneller als Produkte mit dem Standard 802.11b. Die 54g-Technologie ist ideal für Umgebungen, in denen schnellere Netzwerkgeschwindigkeiten für ununterbrochene gemeinsame Nutzung von Internet und Dateien benötigt werden – zu Hause oder im Büro.

Für noch höhere Geschwindigkeiten hat Belkin Produkte mit dem „Wireless G" Hi-Speed Modus, die bis zu 80% schneller sind als Netzwerke mit dem Standard 802.11b und bis zu 35% schneller als Netzwerke mit dem Standard 802.11g.

802.11g 54 Mbps 2.4GHz • Wireless

3 einfache Schritte

In der Installationsanleitung finden Sie genauere Anweisungen



Schritt 1
Legen Sie die CD in das CD-ROM-Laufwerk ein

Schritt 2
Setzen Sie die kabellose Desktop-Netzwerkkarte an einem freien PCI-Steckplatz Ihres Desktop-Comuters ein

Schritt 3
Jetzt können Sie mit dem Netzwerk arbeiten!

BELKIN® | Wireless G Desktop Network Card

Sluit uw desktopcomputer aan op een SNEL draadloos netwerk

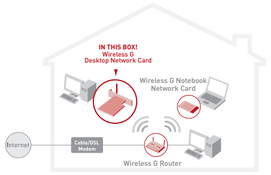
Reliez votre ordinateur de bureau à un réseau sans fil RAPIDE

De functie van het apparaat

Met een **Draadloze G Desktopnetwerkkaart** kunt u een desktopcomputer aansluiten op uw draadloze netwerk. Met een **Draadloze G Router** van Belkin als centraal verbindingspunt binnen uw netwerk, kunnen uw computers uw hi-speed Internetverbinding delen, evenals bestanden, printers en harde schijven.

Voici comment

La **Carte Réseau Sans Fil G** pour ordinateur de bureau permet de relier votre PC à un réseau sans fil. Grâce au **Routeur Réseau Sans Fil G** de Belkin, agissant en tant que centre nerveux de votre réseau, vos ordinateurs peuvent partager une connexion Internet à haut débit, des fichiers, des imprimantes et des disques durs.



Here's what you need

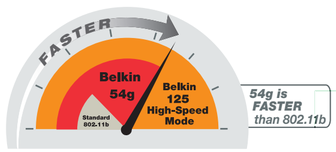
The Central Connection Point

The **Wireless G Router** is the central connection point of your wireless network. Position your Belkin Router between your cable or DSL modem and your computer to start sharing your broadband Internet access.

For Desktop Computers

A **Wireless G Desktop Network Card** connects a desktop computer to your wireless network.
Note: You must first have a Wireless Router to establish a wireless network.

NOTE: If you currently have a computer that is directly connected to the modem, you will not need an additional wireless card/adapter for that computer.



54g is FASTER than 802.11b

De **Draadloze G Desktopnetwerkkaart** is uitgerust met 54g-technologie waardoor netwerksnelheden mogelijk zijn die 75% hoger liggen dan bij standaard 802.11b-producten. 54g-technologie is de ideale oplossing als u in woning of kantoor hogere netwerksnelheden wilt bereiken om onnodig broken bestanden en Internetverbinding wilt delen.

Voor nog hogere netwerksnelheden bieden Hi-Speed Draadloze G-producten de oplossing. De High-Speed Mode (HSM) maakt netwerksnelheden mogelijk die tot 80% hoger liggen dan bij 802.11b-netwerken en 35% hoger dan bij standaard 802.11g-netwerken.

La **Carte Réseau Sans Fil G** pour ordinateur de bureau permet la création d'un réseau sans fil 54g qui est jusqu'à 75% plus rapide que la norme 802.11b. BELKIN | Wireless G Desktop Network Card

Conecte su ordenador de sobremesa a una red inalámbrica RÁPIDA

Esto es lo que hace

La tarjeta de red inalámbrica G para ordenador de sobremesa de Belkin conecta su ordenador de sobremesa a su red inalámbrica. Con un enrutador inalámbrico G de Belkin como punto de conexión central de su red, los ordenadores pueden compartir su conexión a Internet de alta velocidad así como también archivos, impresoras y disco duros.

Per collegare il proprio computer desktop ad una rete wireless VELOCE

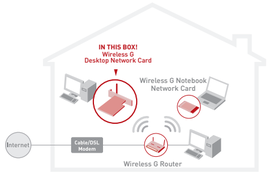
Come funziona

La **Scheda Computer Desktop di rete Wireless G** collega il proprio computer desktop ad una rete wireless. Con il Router Belkin provvisto di tecnologia wireless G come punto centrale della rete, i computer possono condividere connessioni ad Internet ad alta velocità, nonché file, stampanti e dischi fissi..

Ligue o seu computador de secretária a uma rede sem fios RÁPIDA

Aqui está o que faz

A **placa de rede para computadores de secretária sem fios G da Belkin** liga o seu computador à rede sem fios. Com um router sem fios G Belkin como o ponto de ligação central da sua rede, os computadores podem partilhar a sua ligação à Internet de alta velocidade assim como ficheiros, impressoras e discos rígidos.



Here's what you need

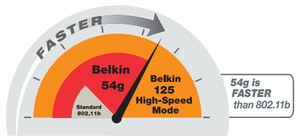
The Central Connection Point

The **Wireless G Router** is the central connection point of your wireless network. Position your Belkin Router between your cable or DSL modem and your computer to start sharing your broadband Internet access.

For Desktop Computers

A **Wireless G Desktop Network Card** connects a desktop computer to your wireless network.
Note: You must first have a Wireless Router to establish a wireless network.

NOTE: If you currently have a computer that is directly connected to the modem, you will not need an additional wireless card/adapter for that computer.



54g is FASTER than 802.11b

La **Tarjeta de red inalámbrica G para ordenador de sobremesa** implementa la tecnología 54g que es hasta un 75% más rápida que los productos estándar 802.11b. La tecnología 54g es ideal para el hogar y la oficina que requieran velocidades de red más rápidas para un uso compartido ininterrumpido de archivos e Internet.

Para conseguir velocidades de red todavía más rápidas, infórmese sobre productos inalámbricos G en modo de alta velocidad que aumenten las velocidades de red hasta en un 80%

La **Scheda Computer Desktop di Rete Wireless G** collega il proprio computer desktop ad una rete wireless. Con il Router Belkin provvisto di tecnologia wireless G come punto centrale della rete, i computer possono condividere connessioni ad Internet ad alta velocità, nonché file,stampanti e dischi fissi.

La tecnologia 54g è la soluzione ideale per le abitazioni o gli uffici dove si richiedono elevate velocità di connessione in rete per condividere l'accesso ad Internet e i file senza alcuna interruzione.

A **Placa de rede sem fios G para computadores de secretária** implementa a tecnologia 54g que é 75% mais rápida do que os produtos 802.11b standard. A tecnologia 54g é ideal para casas e escritórios que necessitem de velocidades de rede mais rápidas para permitir a Internet ininterrupta e a partilha de ficheiros.

Para permitir maiores velocidades de rede, procure os produtos sem fios G do modo High-Speed da Belkin que aumentam as velocidades da rede até 80% em relação às redes 802.11b standard e 35% em relação às redes 802.11g standard.

802.11g 54 Mbps 2.4GHz • Wireless

3 sencillos pasos Por favor, remítase a la guía de instalación rápida para obtener instrucciones detalladas

Paso 1 Inserte el CD en su unidad CD-ROM

Paso 2 Inserte la Tarjeta de red inalámbrica G para ordenador de sobremesa en una ranura PCI disponible localizada en su ordenador de sobremesa

Paso 3 ¡Comience a establecer la red!

3 Semplici passi Per istruzioni dettagliate consultare la guida di installazione rapida

Passo 1 Inserire il CD nell'apposito drive

Passo 2 Inserire la Scheda Computer Desktop di Rete Wireless G in uno slot PCI libero, situato all'interno del computer desktop

Passo 3 Iniziare la comunicazione in rete!

3 Passos fáceis Consulte o guia de instalação rápida para mais instruções

Passo 1 Insira o CD na respectiva drive

Passo 2 Insira a Placa de rede sem fios G para computadores de secretária num slot PCI livre do seu computador.

Passo 3 Inicie a ligação à rede!

BELKIN® | Wireless G Desktop Network Card

Connect

Połącz swój komputer stacjonarny z **SZYBKĄ** siecią bezprzewodową

Csatlakoztassa asztali számítógépét egy **GYORS** vezetéknélküli hálózathoz!

Připojení stolního počítače k **RYCHLÉ** bezdrátové síti

802.11g 54 Mbps 2.4GHz • Wireless

Połącz swój komputer stacjonarny z SZYBKĄ siecią bezprzewodową

Oto jego możliwości

Bezprzewodowa karta sieciowa standardu G do komputerów stacjonarnych podłączy Twój komputer stacjonarny do sieci bezprzewodowej. Przy zastosowaniu bezprzewodowego routera standardu G firmy Belkin jako centralnego punktu połączenia Twojej sieci, Twoje komputery mogą korzystać z szybkiego połączenia internetowego oraz z plików, drukarek i dysków twardych.

Az asztali gépét GYORSABB vezeték nélküli hálózathoz csatlakoztathatja

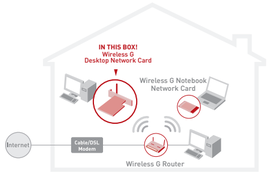
Mit tud?

A Belkin **vezetéknélküli G asztaligép hálózati kártya** csatlakoztatja az asztali számítógépet a vezetéknélküli hálózathoz. Egy Belkin vezetéknélküli G útválasztóval mint a hálózatának központi csatlakozási pontjával, a számítógépe egyaránt használhatja a meglevő nagysebességű Internet-kapcsolatát, valamint lehetővé válik a fájlmegosztás illetve a nyomtatók és mereviemezes tárolók közös használata.

Připojení stolního počítače k RYCHLÉ bezdrátové síti

Vykonává následující

Bezdrátová síťová karta G pro stolní počítač umožňuje připojit tento počítač k bezdrátové síti. Použijete-li jako hlavní spojovací bod sítě bezdrátový směrovač Belkin B, mohou vaše počítače sdílet vysokorychlostní internetové připojení, soubory, tiskárny a pevné disky.



Here's what you need

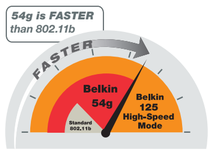
The Central Connection Point

The **Wireless G Router** is the central connection point of your wireless network. Position your Belkin Router between your cable or DSL modem and your computer to start sharing your broadband Internet access.

For Desktop Computers

A **Wireless G Desktop Network Card** connects a desktop computer to your wireless network.
Note: You must first have a Wireless Router to establish a wireless network.

NOTE: If you currently have a computer that is directly connected to the modem, you will not need an additional wireless card/adapter for that computer.



Bezprzewodowa karta sieciowa standardu G do komputera stacjonarnego wykorzystuje technologię 54g, która daje do 75% wyższą prędkość niż standardowe produkty zgodne ze standardem 802.11b. Technika 54g nadaje się doskonale do stosowania w domach i w biurach, gdzie potrzebne są wyższe prędkości transmisji poprzez sieć, aby mieć nieprzerwany, wspólny dostęp do Internetu oraz współdzielonych zasobów.

Jeszcze wyższe prędkości można uzyskać korzystając z produktów firmy Belkin z rodziny High-Speed Mode Wireless G (bezprzewodowe produkty standardu G o dużej szybkości); są one wyższe o nawet 80% od prędkości sieci standardu 802.11b i o nawet 35% od prędkości sieci standardu 802.11g.

A Vezetéknélküli G asztali számítógép hálózati kártya 54g technológiát alkalmaz, amely akár 75 %-kal is gyorsabb, mint a szabványos 802.11b termékek. Az 54g technológia ideális olyan lakások és irodák számára, amelyek gyorsabb hálózati sebességeket igényelnek folyamatos Internet-kapcsolathoz és fájlmegosztáshoz.

A még nagyobb hálózati sebességek eléréséhez keresse a Belkin nagysebességu üzem vezetéknélküli G termékeit, amelyek akár 80 %-kal is növelhetik a hálózat sebességét a 802.11b hálózatokhoz képest és 35 %-kal 802.11g hálózatokhoz képest.

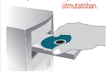
Tento bezdrátový směrovač G pro stolní počítač je vybaven technologií 54g, která je až o 75 % rychlejší než výrobky standardu 802.11b. Technologie 54g je ideální pro domácí a kancelářské sítě, u kterých je požadována vyšší rychlost pro nepřetržité používání Internetu a sdílení souborů.

Chcete-li dosáhnout vyšší rychlosti sítě, seznamte se s vysokorychlostními bezdrátovými síťovými výrobky G značky Belkin, které umožňují zvýšit rychlost sítě až o 80 % v porovnání se sítěmi standardu 802.11b a až o 35 % v porovnání se sítěmi standardu 802.11g.

802.11g 54 Mbps 2.4GHz • Wireless

3 łatwe kroki

Szczegółowe wskazówki zawiera instrukcja szybkiej instalacji.



Krok 1
Umieścić dysk CD w stacji CD-ROM

Krok 2
Włóż Bezprzewodową kartę sieciową standardu G do komputerów stacjonarnych do wolnego złącza PCI w Twoim komputerze.

Krok 3
Rozpocząć pracę w sieci!

3 Könnyű lépés

A telepítés részletes menetét olvassa el a Gyors telepítési útmutatóban.

1. Lépés
Helyezze a CD-t a CD-ROM meghajtóba.

2. Lépés
Helyezze be a vezetéknélküli G asztaligép hálózati kártyát az asztali gépen lavő egyik szabad PCI-aljzatba!

3. Lépés
Már dolgozhat is a hálózaton!

3 snadné kroky

Podrobné pokyny naleznete v návodu na rychlou instalaci.

Krok 1
Vložte CD do své jednotky CD-ROM.

Krok 2
Zasuňte bezdrátovou síťovou kartu G pro stolní počítač do volné patice PCI ve stolním počítači.

Krok 3
Začněte pracovat v síti!

BELKIN® | Wireless G Desktop Network Card

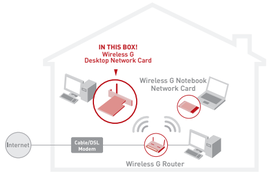
Connect your desktop computer to a FAST wireless network

Here's what it does

The Belkin Wireless G Desktop Network Card connects your desktop computer to your wireless network. With a Belkin Wireless G Router as the central connection point of your network, your computers can share your high-speed Internet connection as well as files, printers, and hard drives.



Here's what you need

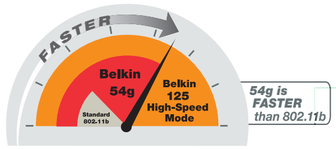
The Central Connection Point

The **Wireless G Router** is the central connection point of your wireless network. Position your Belkin Router between your cable or DSL modem and your computer to start sharing your broadband Internet access.

For Desktop Computers

A **Wireless G Desktop Network Card** connects a desktop computer to your wireless network.
Note: You must first have a Wireless Router to establish a wireless network.

NOTE: If you currently have a computer that is directly connected to the modem, you will not need an additional wireless card/adapter for that computer.



The **Wireless G Notebook Network Card** implements 54g technology that is up to a 75% faster than stantdard 802.11b products. 54g technology is ideal for homes and offices that require faster networking speeds to allow for uninterrupted Internet and file sharing.

To gain even faster networking speeds, look for Belkin High-Speed Mode Wireless G products that increase networking speeds by up to 80% faster than 802.11b networks and up to 35% faster than standard 802.11g networks.

802.11g 54 Mbps 2.4GHz • Wireless

3 Easy Steps

Please refer to the Quick Installation Guide for detailed instructions

Step 1
Insert the CD in your CD-ROM drive

Step 2
Insert the Wireless G Desktop Network Card into an available PCI slot located inside your desktop computer

Step 3
Start networking!
